ACCOUNTING FINANCE MAJOR

The importance of the field of accounting finance is understood more easily today whether economic units are dynamic, variable, strong - weak state, company, etc., where the business world, which is struggling to deal with the global financial crises, and which has become increasingly complicated, has caused the loss of correct decisions in the field of accounting and finance.

PURPOSE OF ACCOUNTING FINANCE MAJOR

To ensure that our students acquire a competitive advantage by rapidly adapting to the increasingly complex business environment conditions after the global financial crises, and to compete with the right approach and decisions, to take them out of the traditional patterns that have become insufficient to meet the needs in the new business environment, In the light of scientific principles, it is the science that is to bring the professional formations to the highest level by equipping them with the most up-to-date information with creative and innovative perspectives.

LEARNING OBJECTIVES

- ✓ Demonstrating proficiency with accounting-finance.
- ✓ Use information to support business processes and practices
- ✓ Demonstrating skills in accounting-finance.
- ✓ Solving complex accounting-finance problems including analysis, interpretation, and communication of results.
- ✓ Learning relevant accounting-finance career skills, applying both quantitative and qualitative knowledge to their future careers in business.

CAREER OPPURTUNITIES in DECISION SCIENCE

- Graduates of our program have theoretical background and numerical skills to evaluate the developments in many fields, especially in the field of accounting and finance. However, they use these knowledge and skills for their professional and academic career development. Our graduates are employed in the following areas:
- Banking
- E-Commerce
- Audit
- Insurance
- Accounting
- Other Financial Institutions (Intermediary Institutions etc.)
